Subject: FW: Drilling Unit Visits

Hi Lana:

Just checking in on three matters.

Monday, June 8. First, does Greg's change in plans below (eliminating the tour) change anything for Monday June 8? I ask because I could be at the Hilton Doubletree (airport) shuttle pick-up earlier than the current planned 8:00 a.m. if you wanted to get an earlier start on the Polar Pioneer recon. Let me know and I can adjust if you prefer.

MI-SWACO Rep. Second, will you have an MI-SWACO rep available for the opening conference and BMP/QAPP discussions on the Monday and Thursday recons? I ask because as you know I have questions about sampling procedures, sample/measurement locations, coordination between MISwaco and Noble/Transocean staff, LWIs, etc. and it would be helpful if a knowledgeable SWACO rep was there or available by conf call. I would like to go through some of the documentation/procedural issues before we start any walk-around as it will help background for what we will look at.

PPE. Other than routine non-operational PPE (e.g. steel-toed boots, hardhat, eye/ear protection), anything else needed in the PPE context? I have FRC overalls but as I recall 2012, they were not needed for the dock-side recons.

Thanks for the additional information and response.

Subject: RE: Drilling Unit Visits

Hanh – Due to load-out timing constraints, Shell must limit remaining pre-season drilling unit visits to those mandatory for season readiness. The pre-season inspections of the drilling units by an EPA representative of the Director of the Office of Compliance and Enforcement will occur. Shell will gladly host EPA Office of Water staff during post-season visits to the drilling units, once they return to the Pacific Northwest. I am happy to be your focal point to arrange for post-season visits.

Sincerely,

Greg J. Horner
